The Honorable Sharon Cooper  
Chairwoman, Georgia House Committee on Health & Human Services  
Georgia House of Representatives  
206 Washington St SW, Room 436  
Atlanta, GA 30334

The Honorable Mark Newton  
Vice Chairman, Georgia House Committee on Health & Human Services  
Coverdell Legislative Office Building  
18 Capitol Square SW, Room 601-H  
Atlanta, GA 30334

**RE: ATA SUPPORT FOR HOUSE BILL 629**

Chairwoman Cooper and Vice Chairman Newton:

On behalf of the American Telemedicine Association (ATA) and the over 400 organizations we represent, I am writing to express our support for House Bill 629, which would permit optometrists and ophthalmologists to engage in the practice of telemedicine when delivering ocular health services.

The ATA is the only organization dedicated solely to the advancement of telemedicine in the United States. Our primary objective is to provide Americans with affordable, high-quality health care whenever and wherever they need it. The use of telemedicine services eases the burden placed on the nation's health care infrastructure, allowing the system to deliver services to millions more patients efficiently and effectively. The ATA represents a diverse and expansive coalition of technology solution providers and payers, as well as partner organizations and alliances, working together to promote the implementation of telemedicine across the country, endorse responsible telemedicine policy, encourage government and market normalization, and deliver education and resources designed to further the integration of virtual care through the use of various innovative technologies.

The ATA applauds the legislature's efforts to enable the use of telemedicine technologies in the practice of eye care in Georgia. Across the United States, patients and consumers are searching for more convenient and affordable ways to access the health care they need. Our organization maintains that policymakers should not mandate the technological modalities by which practitioners deliver care to their patients so long as the practitioners are providing services within the scope of practice and meet the standard of care.

While House Bill 629 allows eye care providers to utilize telemedicine technologies to care for their patients, it makes no adjustments to the standards to which Georgia practitioners are held. Any licensed

practitioner delivering care via telemedicine who fails to meet the standard of care for the condition presented by the patient could still be investigated and disciplined by the Georgia Composite Medical Board. Simply put, allowing licensed practitioners to provide and prescribe ocular care services via the appropriate technologies would grant Georgia residents the opportunity to access high-quality, affordable health care at any place and any time, including from the comfort and safety of their homes.

We thank you for your efforts to expand telemedicine in Georgia. In the context of the ongoing pandemic, it is essential that state legislatures create pathways for their citizens to access their much-needed health care services as easily and efficiently as possible. Please let us know how we can be helpful in your efforts to adopt sensible telehealth policy in Georgia. If you have any questions or would like to discuss further the telehealth industry's perspective, please contact me at [kzebley@americantelemed.org](mailto:kzebley@americantelemed.org).

Kind regards,
