

GlobalMed’s Transportable Exam Backpack Expands Imaging Option for Advanced Virtual Care Delivery

Product Configuration offers TotalExam® 3.2 Camera for Highest Level of Exam Image Acuity

SCOTTSDALE, Ariz. – October 27, 2021 — The [Transportable Exam Backpack](#) is a lightweight, mobile telehealth station offered by GlobalMed, an international provider of virtual health solutions. To provide expanded capabilities to their customers, GlobalMed announced today the offering of a new configuration for the backpack which includes their best-in-class medical imager, the TotalExam® 3.2 camera. With the introduction of the new configuration, clinicians and medical professionals can choose either the TotalExam® Lite Camera and Otoscope or the newly offered TotalExam 3.2 Camera with an otoscope attachment.

The Transportable Exam Backpack serves a wide range of healthcare use cases from remote or rural settings to home care and rehab facilities –bringing care to the patient wherever they are. The new camera configuration expands flexibility for clinicians and medical professionals based on their intended use scenario, budget, and imager preference.

The Transportable Exam Backpack with new TotalExam® 3.2 Camera and Otoscope attachment configuration

“Telemedicine is about removing obstacles to care and our Transportable Exam Backpack helps achieve that by providing a lightweight, complete exam solution that you can take with you to your patient wherever they are located,” said Joel E. Barthelemy, GlobalMed founder and CEO. “By offering the TotalExam 3.2 camera as an alternate option, we hope to allow practitioners a portable solution that meets their needs and supports a higher quality of care to more people.”

The Transportable Exam Backpack is a lightweight, organized virtual health solution that is designed to be easy to carry anywhere and enables practitioners to quickly and accurately assess a patient's condition. In addition to this added choice of examination cameras and otoscopes, the backpack includes the [TotalVitals® Health Monitor](#), [USB Stethoscope](#), and a suite of exam accessories. Optional devices integrated into the existing configurations for added use cases include the [TotalECG®](#), [ClearProbe® Ultrasound](#) and [eNcounter®](#) virtual health software.

About GlobalMed®

GlobalMed powers the world's most advanced virtual health technology platform and wellness applications that support a patient at any point in the continuum of care. Providers are enabled with integrated software and data-capturing tools to deliver a complete and accurate patient encounter for evidence-based treatment and improved patient outcomes. Providers looking to manage capacity, reduce costs, expand patient care and deliver responsible medicine, will get all they need from one platform.

Specializing in both federal and commercial spaces, GlobalMed technology has enabled approximately 50 million consults in nearly 100 countries and on all continents including Antarctica. Its highly secure virtual health platform has earned the U.S. Defense Health Agency's Authority to Operate on the DoD network and is used worldwide from the VA and White House Medical Unit to rural American hospitals, correctional facilities, oil rigs, and even villages in Africa. Founded in 2002 by a Marine Corps Reserve Veteran still serving as CEO.
